

■ Revenue Collection

The CenPOS payment gateway reduces float and the cost of payment collection, while also reducing the scope for PCI Compliance. Key Benefits:

- Tokenization to securely store payment data for variable installment billing and retainer recurring billing. (Credit/debit/ACH.)
- Electronic Bill Presentment and Payment. Sending an invoice electronically is as easy as choosing a printer to send it to. CenPOS EBPP delivers invoices via email, **with a payment object for clients to click and pay**. Automatic reminders are sent for unpaid invoices.

Real-Time Payment Data Intelligence

Who has the best paying clients? Graphical (and CSV exportable data) on payments collected by attorney, location, matter codes or other criteria. CenPOS is simple to implement and works with all major credit card processors. CFO's will save tons of time with our standard reports as well as the fully integrated custom Crystal Reports writer. Most importantly, CenPOS mitigates the risk of internal and external fraud with advanced protections and automated alerts you create.
